

PERFORMANCE EVALUATION OF THE DPP® HIV-SYPHILIS ASSAY

This is a clinical study being conducted by researchers at Chembio Diagnostic Systems, Inc. to demonstrate the accurate detection of HIV and Syphilis in fingerstick and venous whole blood using an investigational test. This study is for males, females and transgender individuals 13 years of age and older.

Research is always voluntary!

Would the study be a good fit for me?

This study might be a good fit for you if you:

- Are living with HIV and are unsure if you've had Syphilis

What would happen if I took part in the study?

If you decide to take part in the research study:

- You will have a finger pricked to collect a whole blood sample.
- You will have approximately 5 teaspoons of blood (4 tubes) taken from your arm by a trained medical professional.

Individuals who take part will receive a \$40.00 gift card at the end of the visit to thank them for their time.

To take part in CP-HIV-SYPH03 Performance Evaluation of the DPP® HIV-Syphilis Assay or for more information, please contact Latinos Salud at (954) 765-6239 or (305) 397-8967.

The principal research investigator for this study is Stephen Fallon, Ph.D.
