

Hi to whomever it may concern,

I was reaching out because my company is currently looking to hire HIV Educators in the Miami area. This is a flexible opportunity to provide education to the HIV community all across the greater Miami area. Would it be possible to promote the position amongst your organization in case anyone is interested in becoming an educator in the pharmaceutical space?

As an inVentiv Health Medical Educator, you will be educating patients on the disease state and the many therapies on the market. This could be a great chance to work in the pharmaceutical industry and make an impact on patient lives! Requirements include the ability to do presentations to small groups of patients, HIV knowledge, and ability to speak Spanish.

Here is a link to the job on our website: <http://commercialcareers.inventivhealth.com/jobs/6105625-bilingual-per-diem-hiv-educator-miami-fl>

Thank you!

Work Here. Matters Everywhere.

Be a driving force in a rapidly evolving healthcare industry.
