

## Medical Case Management Online Learning Curriculum

The Southeast AIDS Education and Training Center is proud to present our new Medical Case Management online curriculum. This online module series addresses some of the issues and barriers medical case managers may experience while caring for people living with HIV. While the courses are geared toward case managers, they are open to all those in the healthcare field who want to learn more about HIV care. Ten modules are currently ready for your viewing, with seven additional modules to be released later this year. Each module is set for the participant to learn at their own pace, and certificates of completion are immediately available at the conclusion of each individual course.
