

Delivery of health literate services is an essential part of culturally competent care.

In It Together

IMPROVING HEALTH LITERACY FOR BLACK MSM

In It Together: Improving Health Literacy for Black MSM is a health literacy training initiative for health professionals serving Black/African American gay, bisexual, same gender loving and other men who have sex with men (MSM).

The **free, 1 hour, in-person** *In It Together Community Training* is designed to help health professionals understand how limited health literacy affects the health of their clients. This training helps health professionals:

- **Recognize** signs that their clients are experiencing limited health literacy
- **Apply** health literate approaches to improve their communication with clients
- **Identify** steps their organization can take to promote health literacy and deliver health literate HIV services

Free, on-site health literacy training is available in communities across the country. Find out if your community is one of them!

Trainers are currently available in 34 communities
