HEADLINES

Miami-Dade HIV/AIDS Partnership selected to Participate in the RWHAP Part A Planning Councils Recruitment and Retention Learning Collaborative

Community Coalition Committee and Partnership Officers to Participate on the LC Team beginning in February 2021!

The Learning Collaborative (LC) will include a series of structured virtual learning sessions that engage Planning Council participants in process improvement with their team, other participating PC/PBs, and subject matter experts. Participating in the LC will support PC/PBs to meet the RWHAP requirement that “not less than 33 percent” of Ryan White HIV/AIDS Program (RWHAP) Part A planning councils shall be individuals who are receiving HIV-related services [under RWHAP Part A], and “reflect the demographics of the population of individuals with HIV/AIDS” in the service area.

Stay Physically Active During COVID-19: Info for People with HIV

Physical activity is one of the best things you can do to improve your health. It helps you feel better, function better, and sleep better. It also reduces stress and anxiety. All of these benefits are still—and perhaps even more—important during the COVID-19 pandemic.

Healthy People 2020 Report Shows Progress Toward Achieving Nation’s Health Objectives, Including in Area of HIV

“Healthy People 2020: An End of Decade Snapshot,” a report summarizing progress toward achieving the nation’s 10-year health objectives, is now available. The Healthy People initiative provides data, information, and tools to drive action and help all Americans live long and healthy lives.

The HRSA HIV/AIDS Bureau (HAB) is highlighting data on housing instability and homelessness among Ryan White HIV/AIDS Program (RWHAP) clients. . .

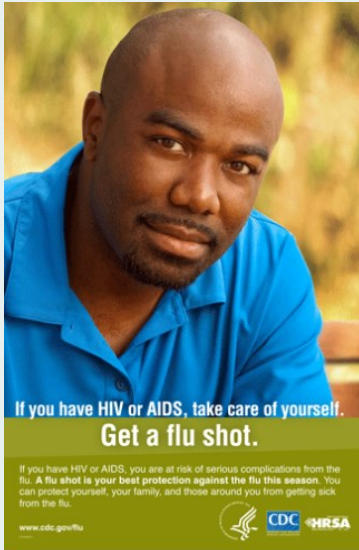

FLU SEASON

From [HIV.gov](#)

Protect Yourself from the Flu: Important Info for People with HIV

Getting a flu vaccine during 2020-2021 is more important than ever because of the ongoing COVID-19 pandemic. When you get vaccinated, you reduce your risk of getting sick with flu and possibly being hospitalized or dying from flu. This season, getting a flu vaccine has the added benefit of reducing the overall burden on the health care system and saving medical resources for care of COVID-19 patients.

Flu & People With HIV

Getting a flu vaccine during 2020-2021 is more important than ever because of the ongoing COVID-19 pandemic. Flu vaccination is especially important for people with certain underlying medical conditions, like asthma, heart disease, and diabetes. People with these types of conditions are at higher risk of developing serious complications from flu . . .
