

**MIAMI-DADE COUNTY RYAN WHITE PROGRAM
ALLOWABLE MEDICAL CONDITIONS LIST**

These conditions are related to or exacerbated by HIV, comorbidities related to HIV, and complications of HIV treatment.

This list is intended to address the federal Health Resources and Services Administration's requirement that services provided through outpatient medical care be related to an individual's HIV status. This list was created to assist medical providers with specialty care referrals and to emphasize the importance of documenting the link between an individual's HIV status and the specialty care service to which a client is referred. This list is a sample guideline to be used in Miami-Dade County's Ryan White Part A/Minority AIDS Initiative Program of the most common conditions exacerbated or caused by HIV or its treatment.

Routine medical diagnostic testing (e.g., Pap smear, mammogram, bone density test, colonoscopy, colorectal cancer screening, and ophthalmologic screening) is allowable as long as such testing follows established medical guidelines, such as U.S. Public Health Service (PHS), American Medical Association, Health Resources and Services Administration (HRSA), or other local guidelines, as a standard of care. Please see the most current, local Ryan White Program Service Delivery Manual for more information.

When provided in an outpatient setting, labs, diagnostics and treatments related to HIV, as indicated above, including complications of HIV treatment related to the following conditions may be covered:
