

Miami
COLLABORATIVE
MSM WORK GROUP

The Miami Collaborative MSM Workgroup

serves as a vehicle to enlist the support of LGBTQ+ community members and allies to curb new HIV infections among MSM. The Collaborative aims to reinvigorate HIV prevention efforts, align with Ending the HIV Epidemic strategies, and mobilize local leaders to support the reduction of risk behaviors. The Collaborative informs local government organizations and communities about the epidemic, its impact on MSM, and how to mitigate the damaging effects of stigma and homophobia, biphobia and transphobia.
