

# CONTACT TRACING: DO YOUR PART TO KEEP YOUR FAMILY, FRIENDS, AND COMMUNITY SAFE

## WHAT YOU CAN EXPECT TO HAPPEN DURING CONTACT TRACING IF YOU HAVE BEEN DIAGNOSED WITH COVID-19.

1

If you have been diagnosed with COVID-19, a public health worker will call you to check on your health.

They will ask you who you've been in contact with and where you spent time while you were sick and may have spread COVID-19 to others.

Any information you share with public health workers is **CONFIDENTIAL**.

This means that your personal and medical information will be kept private.

2

You will also be asked to **stay at home and self-isolate**, if you are not doing so already.

Self-isolation means **staying at home in a specific room away from other people and pets, and using a separate bathroom, if possible**.

**Self-isolation helps slow the spread of COVID-19** and can keep your family, friends, and community safe.

3

If you need support or assistance while self-isolating, the health department or a local community organization may be able to provide assistance.

Continue to monitor your health. **If your symptoms worsen or become severe, you should seek medical care.** Severe symptoms include trouble breathing, persistent pain or pressure in the chest, confusion, inability to wake or stay awake, or bluish lips or face.
