PNS=Persistently Not Suppressed (two VLs within a 12 month period at least 180 days apart where both are NOT SUPPRESSED)

PS=Persistently Suppressed (two VLs within a 12 month period at least 180 days apart where both ARE SUPPRESSED)

Included are clients receiving MCM services thru the RWP; Excluded are clients who had their cases closed in the month of the report, were out of network clients, were new to the RWP within 8 months of the reporting period, had missing viral load results in the reporting period.

Data as of the 3/1/2020 is based on the Provide Enterprise system. Beginning in late March 2020, the MDC RWP suspended the Viral Load requirement through at least the beginning of September 2020 due to the COVID-19 pandemic. Observed difference as of 3/1/2020 may be due to how the data are collected and/or assigned to MCM agencies in Provide and/or the impact of the COVID-19 pandemic on RWP service delivery. Until further notice, all data as of 3/1/2020 is for informational purposes only.
