

Comparison of Two Measures of Persistently Unsuppressed Viral Loads, June-July-August 2020

	% calculated from total # of unsuppressed clients in three-month period	% calculated from the average of three monthly “percents unsuppressed”
Total MCM Clients	7.7%	7.8%
AHF	5.5%	4.7%
Borinquen	5.9%	4.9%
Care Resource	4.9%	5.0%
Citrus Health	2.1%	1.0%
Empower U	12.5%	11.4%
Jessie Trice	10.6%	7.5%
MBCHC	6.6%	6.6%
PHT/North Dade	9.3%	14.8%
PHT/PET Ctr	9.8%	9.3%
PHT/SFAN	10.8%	10.9%
UM-CAP	21.1%	28.3%
Total OAHs Clients	9.8%	9.9%
AHF	7.0%	6.5%
Borinquen	5.1%	3.7%
Care Resource	8.0%	8.0%
CHI	10.3%	10.0%
Citrus Health	7.7%	3.5%
Jessie Trice	9.7%	7.9%
MBCHC	9.1%	9.1%
PHT/North Dade	13.8%	17.2%
PHT/PET Ctr	14.8%	13.4%
PHT/SFAN	10.7%	7.4%
UM-CAP	13.0%	13.8%

Percentages of clients “persistently unsuppressed VLs” are computed from clients with valid VL measurements during the Cycle 2 index months (June, July, August, 2020), with two VL measurements within preceding 12-month period (at least 180 days apart), whose client VLs were either BOTH not suppressed OR whose VLs went from suppressed to unsuppressed. Providers with yellow highlights had less than 10 clients with valid VL measurements for one or more index months, and percentages may be unstable. Latinos Salud was not included.
