Protect your baby from syphilis

Get Tested. Get Treated.

40% of babies born to women with untreated syphilis could die from the infection.

Signs and Symptoms

NOTICE ANY OF THESE SIGNS OR SYMPTOMS?

Not everyone with syphilis has symptoms, so it's important to get tested. If you have symptoms, getting checked and treated quickly is important for both you and any sexual partners in order to prevent infection for your baby.

[Get Tested](#)

Connect to Care

IT'S IMPORTANT TO GET SCREENED

Not all mothers with syphilis have symptoms, so it's important to get tested early and throughout pregnancy. Health care providers are required to test for syphilis during the 1st and 3rd trimesters in Florida.

Syphilis is curable, but left untreated it can be fatal for your baby.

[Get Connected to Care](#)

TALK TO YOUR DOCTOR

Go to all of your prenatal checkups, even if you're feeling fine!

GET TESTED

Test in your 1st and 3rd trimester, get tested at your prenatal visits.

RECEIVE TREATMENT

Get treated right away if diagnosed with syphilis!

HIV Rapid Transmission Response

**Florida
HEALTH**

Investigate

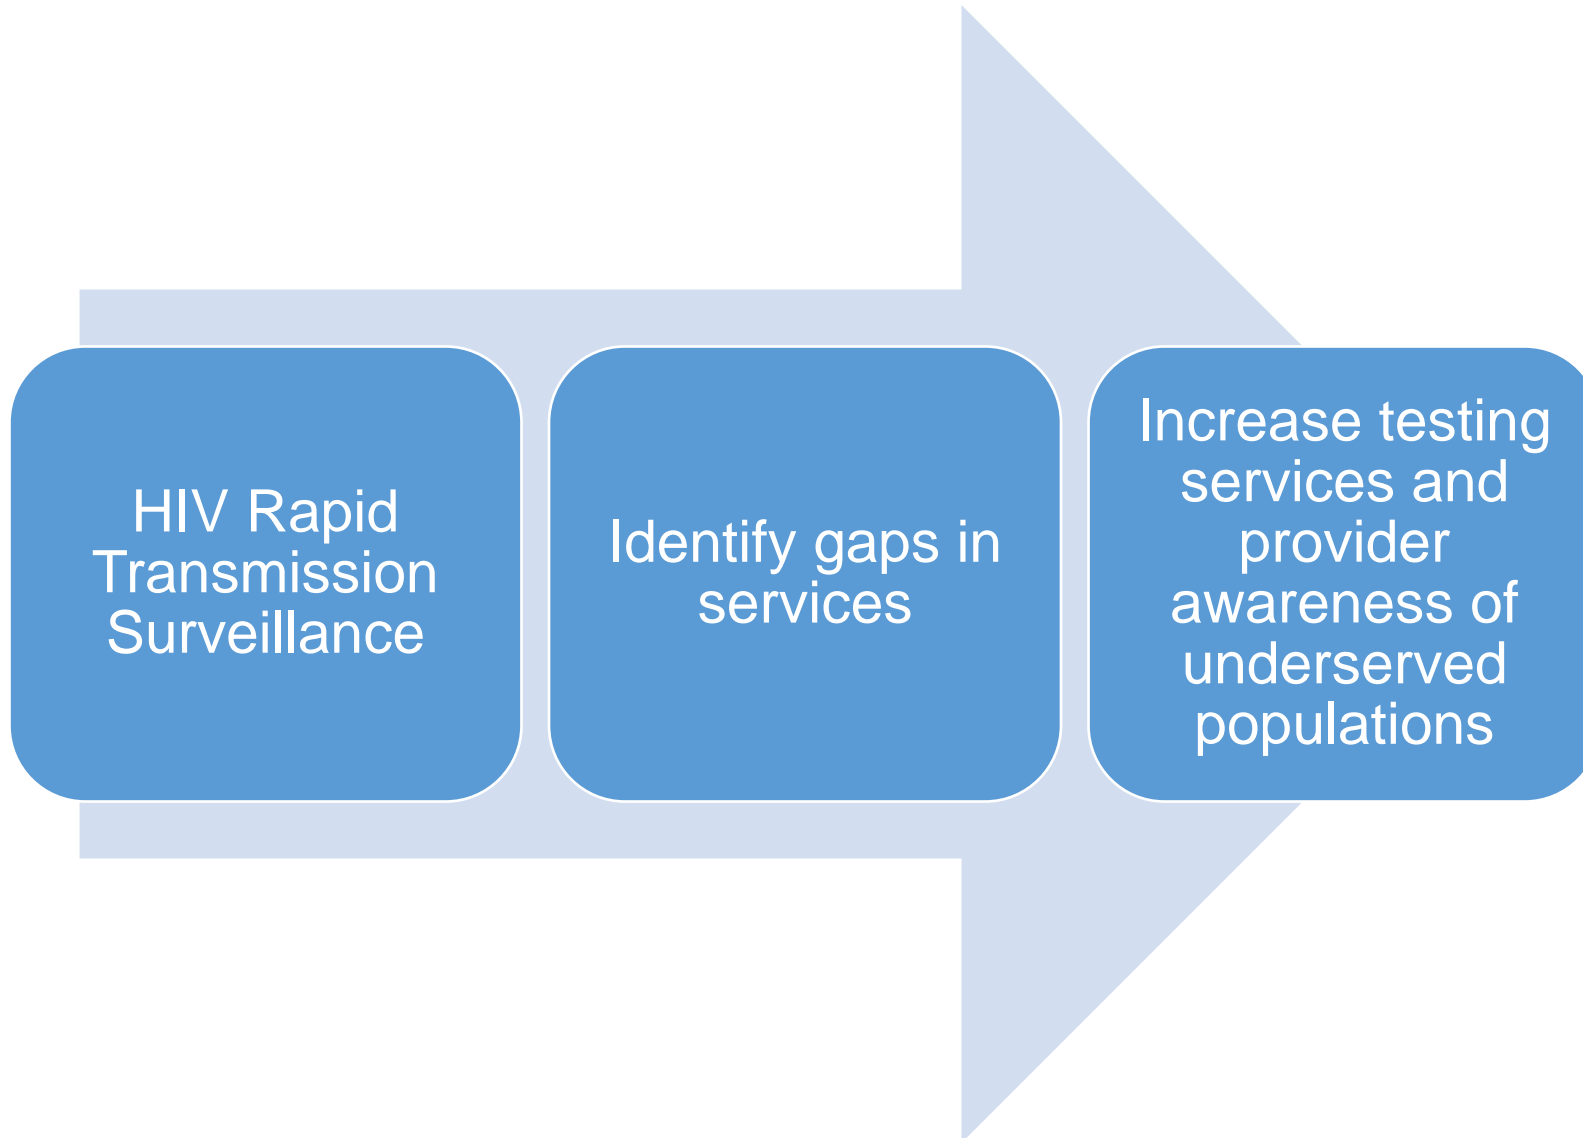

Attention is focused on people **experiencing rapid HIV** transmission.

This signifies **gaps in HIV prevention and/or treatment services.**

This means **resources are not efficiently reaching members of our community who are high risk.**

Response is crucial to identify and close those gaps to better serve the needs of the community experiencing rapid HIV transmission.

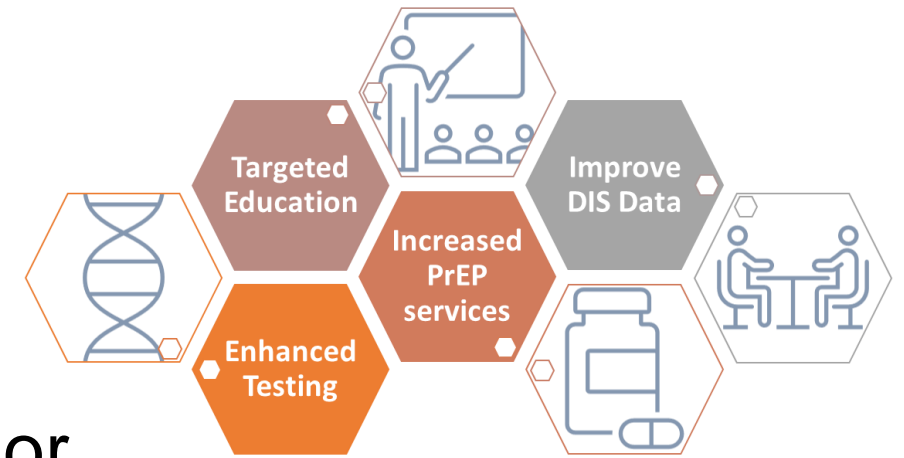

Oster et al. (2021)

Response Mechanisms

We are addressing those prevention and treatment gaps in services through innovative methods.

- ER Screenings
- Telemedicine
- Promoting Status Neutral Approach
- Behavioral Health and Wellness Counselor
- Improving testing, Prep referrals and navigation, education, partner services, and increasing disease intervention specialists.

Genotypic Testing

HIV-1 genotype resistance tests are critical to ascertain the extent of rapid transmission networks

Allowable under test & treat/rapid access guidance for patient re-entry or newly diagnosed

Overarching Goals

- Health and Wellness for all members of the community
- Reduced HIV incidence
- Maintain Continuum of Care for people
- Create innovative methods to solve the STI epidemic to reduce HIV transmission
- Health improvement to reduce Syndemic effects

Syndemics

**Florida
HEALTH**

Syndemics and SDOHs

Syndemic is a term for two or more epidemics, that interact biologically and socially to worsen health outcomes.

HIV, Syphilis, COVID 19, Mental Health, Opioid..

Syndemic interactions with SDOH can worsen disease epidemics and further the presence of health disparity.

Best Practices

- Community Partnerships
- Promoting Status Neutral Approach
- Reducing Syndemic effects
