ALLOWABLE MEDICAL CONDITIONS LIST
Subject to change to comply with Executive Orders.

These conditions are related to or exacerbated by HIV, comorbidities related to HIV, or complications of HIV treatment.

Conditions listed may be accessible under multiple specialties though not specifically referenced.

*This list is intended to address the federal Health Resources and Services Administration's requirement that services provided through outpatient medical care be related to an individual's HIV status. **This list is not exhaustive and is a sample guideline created to assist medical providers with specialty care referrals and to emphasize the importance of documenting the link between an individual's HIV status and the specialty care service to which a client is referred.***

Routine medical diagnostic testing (e.g., Pap smear, mammogram, bone density test, colonoscopy, colorectal cancer screening, optometry or ophthalmologic screening for eye health, etc.) is allowable as long as such testing follows established medical guidelines, such as U.S. Public Health Service (PHS), American Medical Association, Health Resources and Services Administration (HRSA), or other local guidelines, as a standard of care. Please see the most current, local Ryan White Program Service Delivery Manual for more information.
