Resilience, Equity, and Innovation in Urban HIV Responses

At the midpoint toward achieving the Ending the HIV Epidemic (EHE) goal of a 90% reduction in HIV incidence by 2030, the US Fast-Track Cities Summit 2025 will convene elected, clinical, public health, and community leaders to leverage resilience, equity, and innovation in response to shifting federal HIV policies and funding shortfalls.

The Summit will focus on sustaining local Fast-Track Cities and EHE momentum through:

- **Innovative financing and budgetary efficiency**
- **Integrated chronic care service delivery models**
- **Community-led prevention, treatment, and monitoring**
- **Strategic multistakeholder data-informed advocacy**
